

docodemo Wi-Fi setup for Mac

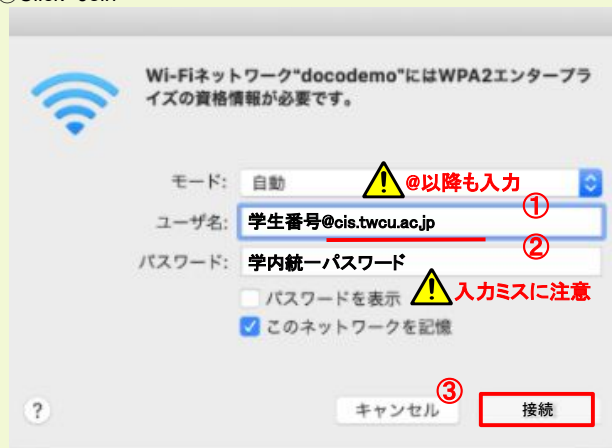

1. Connect to a Wi-Fi network.

- ① Click the Wi-Fi icon in the menu bar.
- ② If Wi-Fi is off, choose "Turn Wi-Fi on."
- ③ Select "docodemo."

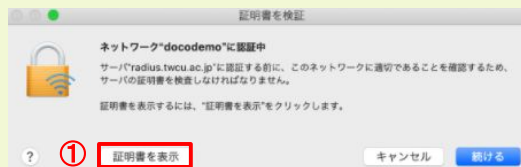

2. Enter Credentials.

- ① Enter your @cis address (XXX@cis.twcu.ac.jp) in the Username field.
- ② Enter your @cis password in the Password field.
- ③ Click "Join"

3. Verify Certificate.

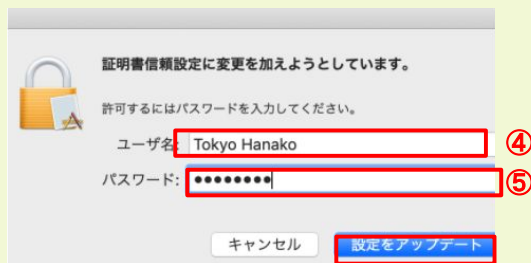

- ① Click "Show Certificate."

- ② Check "Always trust 'radius.twcu.ac.jp'" check-box.
- ③ Click "Continue."

- ④ Enter the Username and Password for the PC's administrator account.
- ⑤ Click "Update Setting."

4. Check the Wi-Fi network connection by opening your browser and surfing the web.

※If the screen saying "The Wi-Fi network 'docodemo' could not be joined" appears, please try wait a few minutes, then try again. This process might take some time.

You will be asked to repeat these steps above if you change your @cis password.

Scan the QR code to access the Online Manual

Once the set up is complete, your device will be automatically connected to "docodemo" when you are in range of its network.
